INDIAN WATER WORKS ASSOCIATION MUMBAI CENTRE

We cordially invite all for
a Round Table Conference on
Cocktail to Integration

Human habitation and water availability are inseparable. Over many thousand years means to make water available are being explored and are getting evolved and process is continued. Today we are entering in water stressed era, so also many ways are also getting developed to tackle the situations.

The general approaches are as follows,

- Traditional Water Infra projects
- Ground Water based Infra projects
- De-salination projects
- Re-cycle / Re-use projects
- Rain Water Harvesting projects

These can be evaluated on the criterions listed below,

- Planning / Approvals
- Sustainability
- Funding
- Implementation modes
- Construction / installations
- Public Participations
- Operation and Maintenances
- Achieving the purpose

As such collectively we all are making a cocktail of these approaches to target solving water non-availability. The Round Table Conference is aimed to churn this subject, a small step to move towards holistic integration for benefit of all connected / all stake holders.
